# 4K Video Downloader: A free video downloader to download videos, playlists and more from any video streaming sites

Avanti Buche  
May 6, 2020

Video has become an important medium of entertainment, education, and information. Currently, there are a total of 1.8 billion monthly active YouTube users and 300 hours of video are uploaded to YouTube every minute. At the same time, the use of smartphones and high internet penetration has increased the number of mediums to watch videos online – like YouTube, Vimeo, TikTok, Facebook, and more.

Almost 4.57 billion people were active internet users as of April 2020, encompassing 59 percent of the global population. This huge number of internet users have popularised online streaming services to watch videos online. But, in most regions, the speed of the internet is not so great or when you don't have access to the internet that requires the offline video which can be stored in your device and accessed whenever or wherever you want to watch.

Online services are great while watching videos online but most of these online video streaming services do not provide direct download options which is a pain for the users. However, some of the video downloading software available in the market are not trustworthy and can not be recommended for the users. Most of these video downloaders come with malware, which can spam your system and risk your system security.

So it is better to choose a video downloader that not only downloads video from most of the services rather it is genuine and recommended by thousands of users. One such nice Video Download software is 4K Video Downloader which allows you to download videos, playlists, channels, and subtitles from YouTube, TikTok, Facebook, Vimeo, and other video sites in high quality.

## What is 4K Video Downloader

**4K Video Downloader** is one of the best 4K video downloading softwares available in the market which works on Mac, Windows, and Linux. You can download videos and audio from video hosting sites such as YouTube, Facebook, and Vimeo, developed by Open Media LLC.

Not only just downloading videos, but the software also comes with a whole bunch of features – like you can make a photo backup from Instagram, create and publish slideshows and extract audio from

video.

## Download YouTube videos, playlist and channels

The most striking feature of **4K Download** you can download the entire YouTube **playlist** and channels besides downloading YouTube videos. Downloading the video content from any streaming website is super easy. You just have to just copy the video or audio link and paste it on the software to download it to your system easily.

There is great news for the movie lovers that the software download subtitles which you can save in the SRT format from over 50 languages. Interestingly, you can get subtitles from the entire YouTube playlist or even channel which is cool feature users may like.

## Supported various file types

4K Downloader features an advanced download acceleration engine that lets you download videos up to 5 times faster than normal speed. With **4K Video Downloader software**, you can download 4K and 8K Ultra HD, 2K Quad HD, 1080p Full HD, 720p HD, and 3D video formats from YouTube.

Most of the time you might need to download multiple files all at a once. Then you don't need to worry about it! The simultaneous download feature can make your job easy that allows you to download multiple videos at a time. Not only that the software allows you to pause, resume, and cancel downloads at any time.

## Convert videos

Sometimes you might need to convert videos that support your video player. Here you can easily convert downloaded videos to the format that you are looking for. The 4K Downloader supports most of the video file types with almost all the popular ones like MP4, FLV, WMV, MOV, ASF, AVI, M4V, MKV, MPG, OGV, TS, VOB, WEBM, and other.

One of the major concerns for the user is that their video to be supported on all their devices and this makes earlier for them as the solution is going to automatically convert and optimize downloaded videos for any type of device like mobile or desktop. The cool thing is you can watch the converted videos hasslefree on your iPhone, iPad, Android phone, Android tablet, Xbox, PSP, PS4, Samsung Galaxy, or another device.

## Price

When we talk about the features and ease-of-use the 4K Video Downloader is one of the top video downloaders available in the market. It is very user friendly, easy-to-use and most importantly it is FREE. You can just download the software following [this link](#) and start using it smoothly.

If you need all the advanced features your **Pro version** which comes with all the features. The 4K Video Downloader comes with two pricing options – The Personal Licence priced at \$15 can be used in three computers and the Business Licence comes at \$75. If you are looking for the bundled price for three of its software i.e. 4K Video Downloader, 4K Stogram, and 4K YouTube to MP3 then you can spend little more on all three solutions.

## Final thoughts

Features, pricing, and functionalities do not make the software the most recommended one but it should also get regular updates and support from the makers. You can get help in the form of a video guide, how-to articles, troubleshooting guidelines, and above all you can connect the support team anytime for the help. 4K Video Downloader gets regular updates, additional features which makes it a preferred offline video downloader.
